 - **Placement Assistance:** Included
-

Course Fee Structure

Course Module	Duration	Fee
Microsoft Excel	1 Month	₹3,500
Advanced Excel	1 Month	₹4,000
Complete Excel & Advanced Excel Course	2 Months	₹7,000

Course Curriculum

Module 1: Microsoft Excel Fundamentals

Excel Basics

- Introduction to Microsoft Excel
- Excel Interface & Workbook Management
- Worksheets & Workbooks
- Rows, Columns & Cells
- Data Entry & Editing
- Cell Formatting
- Number Formatting
- Text, Date & Time Formatting
- Copy, Paste & Paste Special
- Autofill & Flash Fill
- Find & Replace
- Freeze Panes
- Page Layout & Printing
- Workbook Protection

Basic Excel Formulas

- Formula Basics
- Mathematical Operators
- Cell References
- Relative References
- Absolute References
- Mixed References
- Basic Mathematical Functions
- SUM
- AVERAGE
- MIN & MAX
- COUNT & COUNTA
- ROUND, ROUNDUP & ROUNDDOWN
- Percentage Calculations

Module 2: Excel Data Management

- Creating Excel Tables
 - Sorting Data
 - Filtering Data
 - Advanced Filtering
 - Custom Sorting
 - Conditional Formatting
 - Data Validation
 - Drop-Down Lists
 - Remove Duplicates
 - Text to Columns
 - Flash Fill
 - Data Cleaning
 - Handling Blank Cells
 - Handling Duplicate Records
 - Working with Large Datasets
 - Importing Data
 - Exporting Data
-

Module 3: Excel Functions & Formulas

Logical Functions

- IF Function
- Nested IF
- IFS
- AND
- OR
- NOT
- IFERROR
- IFNA

Text Functions

- LEFT
- RIGHT
- MID
- LEN
- TRIM
- UPPER
- LOWER
- PROPER

- CONCAT
- TEXTJOIN
- FIND
- SEARCH
- SUBSTITUTE
- REPLACE

Date & Time Functions

- TODAY
 - NOW
 - DATE
 - DAY
 - MONTH
 - YEAR
 - WEEKDAY
 - WORKDAY
 - NETWORKDAYS
 - EDATE
 - EOMONTH
-

Module 4: Advanced Excel Lookup Functions

- VLOOKUP
- HLOOKUP
- XLOOKUP
- INDEX
- MATCH
- INDEX + MATCH
- Multiple Criteria Lookup
- Lookup Across Worksheets
- Lookup Across Workbooks
- Approximate Match
- Exact Match
- Dynamic Lookup Techniques
- Error Handling in Lookup Formulas

Advanced Formula Techniques

- SUMIF
 - SUMIFS
 - COUNTIF
 - COUNTIFS
 - AVERAGEIF
 - AVERAGEIFS
 - SUMPRODUCT
 - Dynamic Arrays
 - FILTER
 - SORT
 - UNIQUE
 - SEQUENCE
 - LET Function — Introduction
-

Module 5: Pivot Tables & Pivot Charts

Pivot Tables

- Introduction to Pivot Tables
- Creating Pivot Tables
- Row & Column Fields
- Values & Filters
- Grouping Data
- Grouping Dates
- Calculated Fields
- Sorting & Filtering Pivot Data
- Slicers
- Timelines
- Pivot Table Formatting
- Refreshing Pivot Tables
- Multiple Pivot Tables

Pivot Charts

- Creating Pivot Charts
- Chart Selection
- Interactive Charts
- Slicers with Charts
- Dashboard-Based Pivot Charts
- Dynamic Reporting

Module 6: Advanced Excel Data Analysis

- Data Analysis Techniques
 - What-If Analysis
 - Goal Seek
 - Scenario Manager
 - Data Tables
 - Solver — Introduction
 - Forecasting
 - Trend Analysis
 - Variance Analysis
 - KPI Analysis
 - Business Metrics
 - Sales Analysis
 - Financial Analysis
 - HR Data Analysis
 - Inventory Analysis
-

Module 7: Excel Dashboard Development

Dashboard Fundamentals

- What is an Excel Dashboard?
- Dashboard Planning
- Data Preparation
- KPI Creation
- Charts & Graphs
- Interactive Reports
- Dynamic Charts
- Slicers
- Timelines
- Conditional Formatting
- Dashboard Layout
- Professional Formatting

Practical Dashboards

- Sales Dashboard
 - HR Dashboard
 - Finance Dashboard
 - Inventory Dashboard
 - Employee Performance Dashboard
 - Customer Analysis Dashboard
 - Monthly MIS Dashboard
-

Module 8: Power Query with Excel

- Introduction to Power Query
 - Importing Data
 - Connecting Multiple Data Sources
 - Data Cleaning
 - Removing Duplicates
 - Changing Data Types
 - Splitting Columns
 - Merging Columns
 - Removing Unwanted Data
 - Replace Values
 - Merge Queries
 - Append Queries
 - Transforming Data
 - Combining Multiple Excel Files
 - Refreshing Queries
 - Automated Reporting with Power Query
-

Module 9: Excel Macros & VBA Basics

- Introduction to Macros
- Recording Macros
- Running Macros
- Macro Security
- Editing Recorded Macros
- Introduction to VBA
- VBA Interface
- Variables

- Data Types
 - Conditions
 - Loops
 - Basic VBA Functions
 - Working with Worksheets
 - Working with Cells & Ranges
 - Automating Repetitive Tasks
 - Automated Excel Reports
 - Introduction to VBA-Based Automation
-

Module 10: Real-World Excel Projects

- Sales Performance Report
 - Monthly MIS Report
 - Employee Salary Sheet
 - HR Attendance Dashboard
 - Employee Performance Analysis
 - Inventory Management Report
 - Customer Sales Analysis
 - Expense Management Report
 - Financial Analysis Report
 - Product Performance Dashboard
 - Sales Target vs Achievement Report
 - Final Excel Dashboard Project
-

Technologies & Tools Covered

Spreadsheet Software

- Microsoft Excel
- Advanced Excel
- Microsoft 365 Excel

Excel Functions

- IF
- VLOOKUP

- XLOOKUP
- HLOOKUP
- INDEX
- MATCH
- SUMIFS
- COUNTIFS
- IFERROR
- TEXT Functions
- Date & Time Functions
- Dynamic Array Functions

Data Analysis

- Pivot Tables
- Pivot Charts
- Slicers
- What-If Analysis
- Goal Seek
- Scenario Manager
- Forecasting

Data Transformation

- Power Query
- Data Cleaning
- Data Merging
- Data Consolidation

Automation

- Macros
- VBA Basics

Live Projects

- Sales MIS Dashboard
- HR Analytics Dashboard
- Employee Attendance Report
- Salary & Payroll Analysis
- Inventory Management Dashboard

- Financial Expense Dashboard
 - Customer Sales Analysis
 - Sales Target vs Achievement Report
 - Monthly Business MIS Report
 - Final Advanced Excel Dashboard Project
-

Career Opportunities

After completing the **Excel & Advanced Excel Course**, students can apply for roles such as:

- MIS Executive
 - MIS Analyst
 - Data Analyst
 - Reporting Analyst
 - Business Analyst
 - Excel Specialist
 - Operations Executive
 - Sales Reporting Executive
 - HR Reporting Executive
 - Finance Executive
 - Business Intelligence Executive
 - Data Entry & Reporting Specialist
 - Junior Business Intelligence Analyst
-

Prerequisites

- Basic Computer Knowledge
 - No Programming Experience Required
 - No Previous Excel Experience Required
 - Suitable for Students, Freshers, Graduates, and Working Professionals
 - Useful for professionals in HR, Finance, Sales, Operations, Administration, and Management
-

Certification

Upon successful completion of the course, students will receive:

- **Excel & Advanced Excel Course Completion Certificate**
 - **Live Project Certificate**
 - **Internship Certificate** (*if applicable*)
 - **Placement Assistance**
 - **Mock Interview Support**
 - **Practical Project Experience**
-

Why Learn Excel & Advanced Excel at Jaipur Engineers?

- Practical, job-oriented Excel training
- Beginner to advanced-level curriculum
- Hands-on assignments and business datasets
- Real-world MIS and dashboard projects
- Advanced formulas and lookup techniques
- Pivot Tables and interactive reporting
- Power Query training
- VBA and Macro basics
- Online & offline training options
- Placement assistance
- Suitable for students and working professionals
- Training focused on real-world business reporting and data analysis
